# SURYA PRODUCTS LIMITED

## About Us

**Surya Products Limited** is one of the leading companies which we established in the year 1995. We are widely involved in the field of **bottle closure liners, induction liner, induction sealing wads, induction wads**. In order to best introduce **Surya Products -extruded P.E. Foam Liners** to the **Indian bottle closure industry** is our major accomplishment. It is a great technological leap in the field that outshines other liners in all respect. Besides the products, we also provide aluminium printing service.

We produce liners like **induction liner, induction sealing wads, induction wads** etc under our brand name of the company. **Surya Liners** are made available in three layers. The top and bottom closed cell solid polyethylene film acts as barrier layers ensuring smooth surface, thereby preventing product penetration, leakage and absorption.

## Applications of Liners

The superb quality and durability of our offered products enhance their usage and demand in varied industries which are mentioned below:

● Food ● Cosmetics ● Pharmaceuticals ● Liquor ● Chemicals ● Plastic Caps

## Compatibility Of Liners

Our products are chemically inert to most of the products and neither affect nor get affected by the containers content. These liners are customised as per clients Cap Size, Logo, Quality Requirements. Our produced Liners have secure physical seal and trouble-free performance. Surya liners have the optimum resiliency and expand radially under pressure to compensate for the imperfection in the container lip and the closure to ensure excellent sealability. They are free from the usual problems of shrinkage and expansion experienced with conventional liners and other products such as PVC faced cork liners, Printed Induction Wads, Aluminum Foil Laminates. Surya liners have 100% closed cell construction which ensures there is no product absorption by the liners. Our produced Liners also largely assure positive and absolute Chemical Seal. For delicate and sensitive products where blocking physical leakage is not enough, surya liners prevent moisture, vapor, gas aroma and other characteristics preventing product deterioration and contamination. Surya Liners and rings are offered in thickness from 0.6mm to 2.5mm in various diameters.

## Quality Assurance

It follows international Quality Standards in its Manufacturing process and Offers High Quality Liners & Wads to its Clients which are manufactured in Hygienic environment and ensure Dust free liners without any Odour, Contamination & staining.

## International Acceptance

Company is exporting Its Liners & Wads to more then 15 countries around the world with major market in Middle East, Africa, South East Asia, Europe and Latin America.
